

**Child Development**  
**Certificate of Completion**  
**20 credit hours**

The certificate of completion in Family and Consumer Science/Child Development is a terminal degree designed to meet state requirements for employment in licensed day care facilities. This is one of the fastest growing employment opportunities and requires employees to continually re-certify. The course in the Child Development meet those requirements. The certification program requires fewer general education classes than the associate degree.

Upon completion of the certificate students will be able to:

- Demonstrate knowledge of strategies for promoting safe environments for children.
- Demonstrate knowledge of the seven early childhood education competency areas.
- Demonstrate knowledge of child development from conception through age eight.
- Demonstrate knowledge of curriculum development based on social, cognitive, physical, and emotional areas of development.
- Demonstrate knowledge of methods of guiding the development of self-regulatory capacities in young children.
- Demonstrate knowledge of the dynamics of working with family members, community agencies, and other professionals to meet the needs of young children.

*Any student who is ineligible for state, national, or industry licensure or certification is ineligible for entry into this program.*
